DETAILED ACTION

Applicants have elected group II of the restriction , Claims 1,2, 6-11, 15 , 17 and 19 drawn to compounds, pharmaceutical compositions of formula I wherein A is given by the formula as given in the last line 15 page 104, with Q being a hydro aryl or a heterohydroaromatic and B is a phenyl or naphthyl.

If no restriction would be made the below rejection would be a statutory double patenting.

The examiner called the attorney and explained the Double patenting and he was agreeable to it.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1,2, 6-11, 15, 17 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-,2,10,11,12,23 and 24 of U.S. Patent No. US 6693117, claims 1,2,6,7 ,9 and 10 of US 6455545, and claims 1-4 of US 6187792.see first

compound in column 87. Although the conflicting claims are not identical, they are not patentably distinct from each other because they the claims read on the same scope. The A and B definition is of a broader scope in US '792, US 545, and 117.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

It is not clear if applicants are claiming a method of use or compounds .

They have been treated as compound claims by the examiner.

Hence they are essential duplicates.

Conclusion

The claims are not found to be allowable.
